## Save year after year.

Dehumidifiers pull moisture from the air to discourage mold, mildew, dust mites and bacteria from forming in your home.

An ENERGY STAR certified dehumidifier removes the same amount of moisture from the air as a similarly-sized non-ENERGY STAR unit, but uses 15% less energy to do so.

This can save you up to \$175 over the life of the unit, while avoiding 1,500 pounds of greenhouse gas emissions.

With its highly efficient refrigeration coils, compressors and fans, the annual energy saved by an ENERGY STAR certified dehumidifier could power your ENERGY STAR certified refrigerator for four months!
